

## Ahnapee River Water Action Volunteers

Water Resources

Monitoring the Ahnapee Watershed

*Supporting Solutions through Community*

### MONITORING WATER QUALITY IN THE AHNAPÉE WATERSHED

A concern for the health of watershed habitats and resources led to this proposal by the Ahnapee River Watershed Alliance. This community-based group will monitor the rivers and streams of the Ahnapee Watershed to pinpoint possible sources of pollution.

The project will gather baseline water quality data and enter it into a statewide citizen-monitoring database. Trained volunteers will record information on dissolved oxygen, water temperature and turbidity, stream flow, habitat and macroinvertebrate life. The overall objective is to enhance, protect and maintain the ecological integrity and water quality of this watershed.

### MID PROJECT REPORT

Project to begin in the spring of 2005

### *At a Glance...*

#### Project:

To Monitor the Health of rivers located in the Ahnapee watershed by engaging and educating interested citizens about the importance of water quality and generating baseline data.

#### Grant Recipient:

The Ahnapee River Watershed Alliance  
c/o Door County Environmental Council  
Kewaunee County

Amount Awarded: \$1,700

Funding Cycle: 2004

Ahnapee River Watershed Alliance will monitor the rivers and streams of the Ahnapee Watershed to pinpoint possible sources of pollution.
